

**Client:** Bardlsey Construction Ltd  
**Name:** X1 Aire, Leeds  
**Period:** April 2017  
**Value:** £40k  
**Location:** Leeds  
**Works:** Deck Waterproofing and Coloured Wearing Course, Structural Movement Joints and Lining

## The Project

**SL Construction Services** were selected by **Bardsley Construction Ltd** to install a protective Waterproofing and Anti-Skid system to the new car park at **X1 Aire, Leeds**.

**SL Construction Services** successfully installed **1117m<sup>2</sup>** of Fully Reinforced Waterproofing System to the new car park.

All lining was also completed in a single one stop shop package.

**SL Construction Services** installed a spray applied, seamless waterproofing membrane to protect the car park from water penetration. A hard wearing, durable wearing course, pigmented Asphalt Grey, was then instated, providing an anti-skid surface to increase the safety of the car park users.

**SL Construction Services** provided an in house team of installation experts and management to oversee every stage of the installation ensuring the highest quality standards were met at all times.

## The Works

**SL Construction Services** installed a spray applied, seamless waterproofing membrane to protect the car park from water penetration. A hard wearing, durable wearing course, pigmented Asphalt Grey, was then instated, providing an anti-skid surface to increase the safety of the car park users.

## Completion

**SL Construction Services** ability to work to high standards and in line with health and safety guidelines meant that the car park could remain open during the works, reducing the disruption caused to the general public.

The works were completed ahead of schedule and to the client's budget and tendered costs
